

SUPERSCOPE®

Superscope PSD410 vs. Other SD Card Recorders

A Recorder's Performance and Product Support will be critical if you are an Educator and/or a Practicing Musician

Music Practice	<p>The PSD410 combines Tempo and Key Control, A-B Looping, Voice Reduction, Overdub, and extra practice features into a robust music practice environment. There's no moving in and out of menus to access these features one-at-a-time. The PSD410 allows you to run all practice features simultaneously.</p>
Large Color Display	<p>The PSD410 has an oversized full color display. This means room for more options, file names, and screen instructions. Screens for Parametric EQ, Tuning, and VU meters have greater detail.</p>
USB File Exchange	<p>The PSD410 reads from and records to USB storage devices or mini SD card (or micro SD with adapter). You can even alter the Key or Tempo of a file (or remove the vocals), and then move the altered file onto a computer or USB storage device for a student or band mate.</p>
Recording	<p>Superscope specializes in recording equipment for music professionals. The PSD410 includes:</p> <ul style="list-style-type: none">• Balanced XLR Inputs & 48V Phantom Power• Mic Attenuation and Analog Limiter Circuit• Parametric EQ for Mic Inputs• Separate Mic Level Control for L/1 and R/2• Effects (Reverb, Delay)• Input and Panning Options• Choose Battery or AC Operation• Built-in Stereo Microphones• Standard ¼ inch Headphone Jack with Level Control• Built-in Jog Wheel & Joystick (for fast & accurate navigation)
Unlimited Customer Support	<p>Superscope offers free, personal customer support, the hallmark of our PSD recorder product line. If you ever need help recording or using a feature, call our U.S. toll-free number to speak with an informed support representative who will be glad to walk you through any questions you may have.</p>
