

SUPERSCOPE®

Transcribe, Practice, and Play-Along

- Play a file in a different key while preserving the tempo.
- Adjust a file's tempo without affecting the key.
- Combine key & tempo changes for ultimate control.
- Seamlessly loop any section of audio and change key and tempo.
- Reduce lead vocals from stereo recordings.
- Save loops and key/tempo settings as a "snapshot" and export or create an audio CD.

Recording

- Record vocals/instruments with play-along CDs or files from your music library.
- Review your recordings and save the performances you want to keep.
- Record concerts, rehearsals, or song ideas at high quality 16 or 24-bit audio resolution.
- Recording is a snap! Easy integration with virtually any USB microphone or USB interface.

Easy To Use

- Simple and unique interface is easy to use. No tedious and never-ending menus to navigate.
- Import music collections to the Elevation Library for instant access... all your music files in one convenient location.
- Elevation supports common file formats WAV, AIFF, MP3, and WMA.
- PC and Intel Mac compatible

SUPERSCOPE.
